(54) Title: **CONTEXT-OF-USE INDEPENDENT CONTENT SYSTEMS**

(57) Abstract: The system and method of the present invention provides a content system (100) and method having only relations between content 104 (e.g., relations between music, CD-cover and lyrics), and the content itself (103), and excludes any context-of-use information. Since any product or appliance (106) configured with an embodiment of the present invention (e.g. CD-player or Picture-viewer) is in the context-of-use, it is left to the product or appliance to distinguish content from content descriptions. Alternatively, an embodiment provides a post-processing system (105) that supplies a context.
